Humphrey M. Uno

Full Stack Web Developer | unohumphrey260@gmail.com | +639261159392

Github | LinkedIn | Portfolio

Developer with over 3 years of professional experience in building robust, interactive, and scalable web based applications. Equipped with problem solving and analytical skills, that leads to a fluid workflow. Slowly but steadily adapts to new environments and technologies.

Skills

- Fullstack web development (**React, Typescript, TailwindCSS, Laravel, Django, RESTful APIs**), relational databases, version control (**Git, Github, Gitlab**), system analysis, and UI/UX design (**Figma**).
- Time management, communication, adaptability, attention to detail, creativity, and collaboration.

Professional Experience

Junior Python Developer   Nov 2024 - June 2025
Freelance | Part-time

- Contributed to the development and maintenance of a social media platform.
  - Debugged minor user interface issues, including styling inconsistencies, to improve usability.
  - Implemented a user suspension feature as a safer alternative to account deletion.

Computer Programmer II   Sept 2024 – Present
Bicol Regional Hospital and Medical Center

- Performed technical support, resolving software, hardware, and network related concerns.
- Maintenance and system administration of Telehealth: an online teleconsultation system.
  - Development of patient scheduling feature with email notification feature.
- Maintenance, system administration, and continuation of development of an inventory system.
  - Performed migration of hundreds of thousands of data between 2 databases with different structures using Laravel seeders, while ensuring data integrity.
  - Improvement of overall UI/UX for greater user satisfaction.
  - Improvement of report generation by allowing users to customise data formatting and improving the overall styling of the printed reports.

Computer Programmer   Aug 2023 – Sept 2024
Bicol Regional Hospital and Medical Center

- Developed a custom document management system with file manager, version management, document templates, etc.
- Developed an IP address registry system for recording and tracking of ip addresses used across the hospital.
- Performed UI design using Figma for an employee attendance tracking app.

IT Technical Support | Intern   Feb - May 2023
Bicol University Graduate School

- Provided basic software and hardware troubleshooting.
- Handled data entry of approximately 1,000 graduate students in various courses.
