

Humphrey M. Uno

Full Stack Web Developer | unohumphrey260@gmail.com | +639261159392

[Github](#) | [LinkedIn](#) | [Portfolio](#)

Developer with over 3 years of professional experience in building robust, interactive, and scalable web based applications. Equipped with problem solving and analytical skills, that leads to a fluid workflow. Steadily adapts to new environments and technologies.

Skills

- Fullstack web development (**React**, **Typescript**, **Laravel**, **Nest JS**, **RESTful APIs**), relational databases, version control (**Git**, **Github**, **Gitlab**), system analysis, and UI/UX design (**Figma**).
- Time management, communication, adaptability, attention to detail, creativity, and collaboration.

Experience

Computer Programmer II

February 2026 – Present

Department of Social Welfare and Development

- Developed a vehicle booking module for an existing system used for administrative processes
 - Features include status tracking, dispatching, notifications, and reports.
 - Performed continuous end user support after deployment while gathering feedback to improve system usability
- Initiation of the development of an inventory system
 - Performed system requirement analysis by reviewing Standard Operating Procedures, Reports, and existing databases / systems.

Computer Programmer

October 2023 – February 2026

Bicol Regional Hospital and Medical Center

- Automated repeated tasks such as database backups using bash(in Linux)/batch(in Windows) scripts
- Frontend development of a Hospital Based Cancer Registry
 - Designed and developed user interface for chemotherapy cycle monitoring, patient profile, printable forms, and other resources
- Maintenance and system administration of Telehealth: an online teleconsultation system.
 - Developed a patient scheduling feature with email notification.
- Maintenance, system administration, and continuation of development of an inventory system.
 - Performed migration of hundreds of thousands of data while ensuring data integrity.
 - Improvement of UI/UX and report generation by allowing users to customise data formatting and improving the overall styling of the printed reports.
- Developed a document management system from scratch for centralized document access and version tracking

Junior Python Developer

Nov 2024 - June 2025

Freelance | Part-time

- Contributed to the development and maintenance of a social media platform.
 - Debugged minor user interface issues, including styling inconsistencies, to improve usability.
 - Implemented a user suspension feature as a safer alternative to account deletion.
